

How **Private 5G** Can Improve

# Manufacturing Productivity?

Manufacturing Companies Require Private 5G for Uninterrupted Connectivity for IoT Sensors & Devices.

## Number of IoT Devices Worldwide

# Key Use Cases for Private 5G in Manufacturing

## 1 Preventive Maintenance

With IoT sensors, data can be collected to anticipate maintenance requirements, thus preventing unexpected downtime.

## 2 Productivity Monitoring

IoT sensors can be used to track machine & worker productivity to identify the areas of improvement.

## 3 Legacy Machine Connectivity

Private 5G connects legacy machines to the internet without replacement to extend their lifespan.

## 4 Remote Control of Robotics

Private 5G can be used to control robots remotely to improve safety and efficiency.
